THE PATIENTS ENJOYING RINGLING'S CIRCUS

REPORT OF THE PRESIDENT

To the Board of Trustees and Board of Supervisors,

Ladies and Gentlemen:

In my report of last year I spoke of the recent opening of the new building, which we have called the Tower Building, at the Country Branch, and also referred to the fact that the Private Patients Pavilion adjoining our City Hospital was nearing completion.

The former, having now been in operation for a full year, it is of interest to note that its sixty beds have been continuously occupied during all this time. The helpful curative work of our hospital has thus been extended to many whom it was impossible to care for heretofore and the Country Branch is proving itself an increasingly valuable adjunct to our institution.

The budget of the Country Branch has been carefully watched and the income from endowment, supplemented by receipts from those patients able to pay in part for their care, has met the expenses of conducting this highly important work. The property has been well kept up, and the money reserved for landscape work in building the driveways, planting trees and fencing the land has been judiciously used, with the result that the appearance and condition of the Country Branch give us reason for satisfaction and pride.

To Mrs. Bridgman and the personnel at White Plains, for their interest and faithful service, I wish to express the appreciation of the Board.

The new Pavilion in New York was opened and put in operation on April thirtieth. This is a notable addition to our plant and widens the field of work of our staff. To date 93

persons have availed themselves of its facilities, and it may be assumed that in due time this building will be fully occupied.

The building of the new Pavilion afforded us an opportunity to make certain much needed changes in the old building which should increase the efficiency of the work of the hospital and facilitate the treatment of the patients in the dispensary.

In this connection two valuable improvements have been carried out. A large and commodious history and record room has enabled us to rearrange our records and greatly facilitate their use.

The other feature added is a new X-Ray view room. The importance of the X-Ray in orthopaedic work being so great, it is proper that we should have this room for the accurate study of X-Ray plates.

The number of patients treated in the hospital and dispensary taxes our capacity and lays a heavy burden upon the Surgeon-in-Chief and a loyal Staff.

The financial situation in respect of the city hospital is satisfactory and it seems assured that we shall close the year without incurring a deficit. This condition is due in large measure to the watchful care of Miss Root and her assistants to whom our thanks are due. Were it not for our many friends and supporters however, who each year evidence their affection for and faith in the Orthopaedic Hospital by renewing their gifts, we should be hampered indeed and the work would suffer in consequence. This support from the public encourages all alike, the Trustees, the Supervisors, the Staff and the personnel.

Our Board has suffered the loss by death of one of its members, Walter E. Maynard. For this hospital he had a real affection. His interest in it was active and his counsel and advice were often sought and always valued, and as an associate and as a friend his absence is deeply felt.

Respectfully submitted,

ROBT. S. BREWSTER,
President.

December 10, 1925.

A VIEW OF THE SUN ROOM IN THE PRIVATE PAVILION

REPORT OF THE BOARD OF SUPERVISORS

To the Trustees of the New York Orthopaedic Dispensary and Hospital,

GENTLEMEN:

We have the honor to present to you the report of the Board of Supervisors.

The year 1925 has been a very interesting and successful year for the Hospital.

Our kind friends have stood by us loyally and their co-operation has made many things possible.

Our auxiliary societies' help as usual has been unfailing.

The Orthopaedic Hospital Red Cross Unit has made many of the dressings used in the Hospital.

The Orthopaedic Hospital Guild provides linen and clothing for the two Girls' Wards and supports three free beds.

The Orthopaedic Hospital Sewing Society has given all the other linen used in the Hospital and the Junior Guild has given the salary of a visiting nurse, all the clothing for the children on the sixth floor and supported a free bed.

Miss Caroline White, though no longer in New York, has again given most generously toward the support of a masseuse. This proof of Miss White's real interest in the Hospital is very much appreciated by the Board. The work of the Visiting Nurses, that very important branch of the Hospital service, has been supported as in former years by Mrs. Charles B. Alexander, Mrs. Robert S. Brewster, Mrs. Whitelaw Reid, Mrs. Henry White, Mrs. Frederick Vanderbilt, Mrs. A. Murray Young, Mrs. L. Sanford Procter, Mr. Harry F. Knight and the Junior Guild. The faithful work of these nurses is of a value to the Hospital which it is difficult to over-estimate. Without them the Hospital would be greatly handicapped.

The Board of Education is now sending us only two teachers, the High School teacher having been withdrawn, as there were so few pupils of the requisite standing in the Hospital. The remaining two are doing excellent work.

There was a true Christmas spirit throughout the Hospital this year. All the children had stockings from Mrs. Wilson, the Orthopaedic Hospital Guild, the Junior Guild and Miss Allen. Each nurse and each patient received a book and a present from Mrs. White and a Nurses' party was given by Miss Hamilton, Mrs. Murray and Mrs. Choate.

Mrs. Young and Mrs. Brewster gave a Christmas tree to each ward floor, a present to each patient and a hundred presents to the Dispensary patients. Mrs. Pyne and Mrs. Tilford gave two hundred presents to the Dispensary patients. Mrs. Pyne and Miss Frelinghuysen provided ice cream and cake for the Christmas dinner and the Hospital was decorated with holly by Mrs. Dickey. Christmas baskets were distributed to the families of the patients and many gifts from the Hospital's kind friends added to every one's happiness.

The outstanding event of the past year has been the opening of the Private Patients' Pavilion. The dream of years has come true and we have now a perfect building both from the point of view of convenience and attractiveness.

I regret that I cannot here enumerate those whose generosity and work helped build and furnish this addition to the Hospital. The fact that at the present writing twenty-two rooms are occupied proves how much it was needed.

The past year has truly been a most successful one.

Respectfully submitted,

Cora Oliver Choate,
Secretary.

A VIEW OF THE NEW HISTORY LIBRARY

REPORT OF THE SURGEON-IN-CHIEF

To The Board of Trustees of the New York Orthopaedic Dispensary and Hospital:

GENTLEMEN:

The total number of patients treated in the institution during the year 1925 was 22,866. Of this number 8,933 were new cases and the remainder were those continued under treatment at the beginning of the year.

Of this number 1,449 were suffering from joint tuberculosis; 6,138 from deformities of the feet; 994 from non-tuberculous deformities of the spine, 218 of which were developmental. There were 818 fractures, 85 of which were fractures of the spine, and 2,989 were cases of paralytic deformities. The remainder, 10,478, were suffering from a great variety of disease and deformity.

Table I shows the results in the treatment of these patients and it appears that 579 were discharged cured; 4,012 were discharged relieved; 297 were discharged for neglect; 102 were discharged incurable; 2,512 were discharged after their first visit, or came for consultation only; 349 were referred to other clinics; 12 died, and 15,003 were carried forward under treatment at the end of the year.

The work in the treatment of these patients is shown under Table II, where it appears that the total number of visits made in the Dispensary during the year is 74,692; visits by new patients 8,933; visits by nurses to patients at their homes 8,071, making a grand total of 91,696. The number of patients visited at their homes by nurses was 2,895.

In Table III there appears the detail of the work in the manufacture of braces in the shop, and the total number made was 3,766; the number repaired was 4,988.

CITY HOSPITAL. The number of patients in the hospital on January first, 1925, was 76; the number admitted during the year was 1,036, 1,030 were discharged and one died, leaving 81 in the

hospital on January first, 1926. The average number in the wards each day was 84.5; the average stay of each patient was 27.7 days. There were 149 patients waiting for beds at the end of the year.

The number of operations performed was 1,491 and the number of patients operated on was 1,149. (Table V).

Private Patients' Pavilion. From May first, 1925, to December 31st, 1925, 98 patients were admitted and 88 discharged, leaving ten in the Hospital at the end of the year.

Country Branch. The number of patients in the hospital at the beginning of the year was 161; the number admitted was 241; the number discharged was 251; four died, leaving 147 in the Hospital on January 1st, 1926.

The beds made available by the new addition at the Country Branch opened in the fall of 1924, and therefore in operation during the year of 1925, have made it possible to discharge patients from the City Hospital in much shorter periods of time, thereby increasing our hospital capacity here. Evidence of this fact is shown in the increased number of patients, 1,112 this year, as compared with 958 of last year, and a duration of stay of 27 days this year as against 33 last year.

A most important event, surgically speaking, in connection with the year's activities has been a final report made on the first twenty cases of tuberculosis of the hip fused by an operation which has been developed in your hospital. Of these twenty cases, nineteen are definitely fused and cured, and free from all symptoms. A long enough period has elapsed since the operation to make this report of value and justify a more extensive application of the operative procedure to an increasing number of patients.

From a general standpoint the most important in the year's activity was the opening of our Private Patients' Pavilion, which took place on April 30th. The addition of this pavilion with 32 beds makes the combined total bed capacity of the City Hospital and Country Branch 300 and furnishes accommodations for patients in all circumstances of life.

The educational work of the institution has progressed this year, better than ever before. The fourth year Columbia students are taught in the wards and in the out-patient department of the

hospital every day during the college year; while the third year students have an extensive course of ten weeks at the college in anatomy, co-ordinated with clinical work. In addition to this educational effort, many surgeons from cities of this country and abroad have attended our clinics during the year for varying periods of time. Thus may be seen how far-reaching are the institution's efforts in an educational way.

The re-organization of our staff which took place three years ago has been the means of improving the work in detail in every department and of strengthening the personnel of the staff to a very marked degree. As the knowledge of disease becomes more complete and its study more comprehensive, a larger expenditure is required for equipment, such as laboratories, x-ray and follow-up systems as well as in the personnel, both lay and professional. By such means, however, accurate methods of diagnosis and treatment are developed and a higher percentage of cures effected in a much shorter period of time. For instance, by the older, inaccurate methods of a few years ago cases of joint tuberculosis, scoliosis and many other conditions, treated in this institution, were under treatment for many years, involving the expenditure of large sums of money, and with incomplete results or failure. Under modern methods these patients are cured and returned to normal life in comparatively short periods of time and at relatively small expense, so that a study of the increasing budget for this hospital does not present the real economic aspect of the work unless it be made in the light of the surgical work and the success or failure of that work as applied to the individual patient.

Respectfully submitted,

Russell A. Hibbs,
Surgeon-in-Chief.

A ROOM IN THE PRIVATE PAVILION

REPORT OF THE SUPERINTENDENT

To the Board of Trustees,
New York Orthopaedic Dispensary and Hospital.

GENTLEMEN:

The fifty-eighth annual report of the superintendent for the year 1925 is herewith submitted.

All of the departments of the Dispensary and Hospital have been very active during the year, and very much the same problems have confronted us as in former years. About two hundred more patients were cared for in the wards and some two hundred more patients were operated on than in 1924.

The total operating expenses for the year are shown in the detailed report of the treasurer which follows.

The number of patients under care in all departments of the institution for the year was 22,866. The cost per visit of each patient to the Dispensary was 90 cents, and there were 83,625 visits. The cost per visit of a visiting nurse to patients in their homes was $1.31. The number of patients receiving hospital care in the wards was 1,112; the average stay of each patient was 27.7 days and the cost per patient day was $4.53. The total number of patient days in the wards was 30,815, of which 11,250 were pay days and the balance, 19,565, or 63½ per cent, were free days.

It is impossible to render a comparative report of the income and expenditure of the entire institution for the year 1925 with previous years, as our problem has undergone a change of paramount importance since last year in the addition of a new pavilion for private patients, which was opened the first of May.

This building adjoins the hospital and has a frontage of thirty-eight feet on East 58th Street, is one hundred feet deep, and is eight stories in height, with a basement. On the top floor of the building are located: A delightful sun-room and verandah, with southern and eastern exposure, which affords a very cheerful

resting place for patients, entirely away from institutional atmosphere; the operating suite, consisting of a main operating-room with built-in instrument cabinets, an anesthetizing room, a plaster room, surgeons' scrub-up room, sterilizing room, with the latest models of sterilizing equipment, nurses' workroom, doctors' and nurses' locker rooms, shower baths, etc., all modern to the last minute detail in construction and usefulness.

The next four floors are devoted to rooms and suites for private patients, thirty-two in all, with southern, eastern and northern exposures. Each floor is furnished and equipped in a most attractive manner, in which we have endeavored to carry out a decorative scheme of a character pleasing to patients, many of whom have expressed surprise and pleasure at the homelike appearance which it presents, and the arrangement is such as to be conducive to the best and most convenient care of the patient. There is a distributing pantry on each of these floors, completely furnished with china, silver and all facilities for the serving of the patients' food. At about the center of each of these floors is situated the desk for the floor nurse and a comfortably furnished nurses' station, where special nurses may wait when not in the rooms of the patients. Every floor has linen, medicine, stretcher and wheel chair closets, and a utility room equipped with sterilizing apparatus, etc., and there are also a bathroom and a toilet for patients. There are two suites of rooms on each floor which may be used as separate rooms when not required together. Some of the rooms have bathrooms in connection and others toilets.

The third floor is for nurses and contains ten rooms, closets, baths and toilets, all cheerfully and completely furnished. The second floor is set apart for the use of maids, and there are here twelve rooms with closets, baths and toilets. These two floors are directly communicating with the main building, the corridors being continuous. On the main floor we have a reception room for patients and their visitors, facing East 58th Street; an office, a lobby, telephone booth and the Board Room, which was formerly located at the front of the main building, on East 59th Street, but which has now been taken over for the office of the Chief Surgeon. The north end of this floor, a light, spacious room,

with closets, is used as a permanent history room for the records of the patients of the entire institution, and it affords a most excellent work room and library for our histories, so essential a part in hospital work today. This library is sufficiently large to allow for many years of growth and expansion.

On the first floor is located the dining-room for special nurses, which is attractively equipped; a distributing pantry for it, and a locker room for the nurses who do not live in the hospital. On that floor are also located rooms for male employees, a history transfer room, store rooms for hospital supplies, printed matter, etc.

At the same time the following changes and additions were made in the main building: The office of the Chief Surgeon was remodeled and refurnished. The room formerly used for this purpose was taken over by the appeals department; a larger office was secured for the bookkeeping; more room for the department of visiting nursing; and a new, large, very complete women's locker room, equipped with steel lockers for the outside workers of the Dispensary and Hospital. More space and better facilities have been provided for the X-ray department, where a new view room has been built, and a photographing unit. Much needed alterations have been made in the main kitchen and a new ice cream room was added. Food trucks of a late design have been provided for conveying the food from the kitchen to the floors in the pavilion. General painting was done throughout the whole main building and any necessary repairs required to place the entire plant in first-class condition in every way were carried out. With the enlargement and improved conditions we hope to go forward to still greater advancement and achievement, giving new health to the patients under our care and fitting them for an active and useful life.

To all of those who have contributed by gift or personal service in any way to the Hospital or its patients, our best thanks are due, especially to the devoted contributors who do not fail in their generosity.

Mrs. Overton's Orthopaedic Hospital Guild Red Cross Unit has been of very practical assistance to us again this year in making a large number of surgical dressings for use in the operating

room and on the wards, and I wish to express our sincere thanks to its members.

We are deeply grateful to Mrs. Edward S. Harkness, who provided an ideal home in the country again this year for thirty of our convalescent children for five months. These little patients were very greatly benefitted by their delightful summer at Dorcas House.

I wish to renew our thanks to the People's University Extension Society for its helpfulness in sending occupation therapists to work with the boys and girls on the wards.

Too much cannot be said in praise and appreciation of the excellent co-operative spirit of officers and employees, who have contributed their share in enthusiasm and loyalty to the institution during the past year.

I wish also to take this opportunity to convey my thanks to the members of your Boards for their encouragement, which has played so great a part in the progress and completion of our undertaking in the interest of the new Pavilion and its construction, equipment and furnishing.

Respectfully submitted,

THEODORA S. ROOT,
Superintendent.

ORTHOPAEDIC HOSPITAL GUILD REPORT

The report of the Orthopaedic Hospital Guild for the year 1925, is much the same as the report of the previous year. We have paid for two endowed beds, and have provided the necessary articles for 20 beds. We have expended a large sum for linen, clothing, bedding, etc., for our wards.

We have lost through death during the past year, two members, Mrs. Percy Chubb and Mrs. Robert H. McCurdy. Mrs. Overton's Red Cross Unit has done wonderful work. They have made during the past year, 47,938 surgical dressings, which includes dressings for the whole hospital.

Respectfully submitted,

FLORENCE B. FLEMING,
Secretary.

REPORT OF THE ORTHOPAEDIC HOSPITAL SEWING SOCIETY

The annual report of the Orthopaedic Hospital Sewing Society for the year 1925 differs somewhat from the report of the previous year. Many more articles were added to the supply, very few additional articles were taken out for use, leaving an unusual number in the linen closet to begin the new year with.

Articles on hand January 1st, 1925	2,007
Number of articles added during the year	4,883
	6,890
Number of articles taken out for use	3,285
Leaving in linen closet January 1st, 1926	3,605

It is with deep regret we report the loss of several members through death and resignation.

Respectfully submitted,

KATHERINE M. LUCE,
Secretary.

REPORT OF THE SUPERINTENDENT OF THE COUNTRY BRANCH

To the Board of Trustees of the New York Orthopaedic Dispensary and Hospital—Country Branch.

GENTLEMEN:

The number of patients treated at the Country Branch this year was 335, eighty-two being over sixteen years of age and the remaining 253 under that age. The average number of patients per day was 160. The average days stay per patient was 177. The total patient days were 58,637.

Compared with the past few years—with their planning for new buildings, erecting, equipping and furnishing them—this year has been uneventful and the work of the institution has to a large extent crystallized. While routine and the usual have prevailed, there has been the same sustained effort as heretofore by all concerned in the development and progress of the institution.

In September more than one hundred seventy old patients and their friends returned for reunion. Many of them were patients who had been in the institution in its early days, who have always kept in touch with and interested in it. All seemed to take the same pride and joy in its development that the most loyal collegian takes in his Alma Mater. Two brought their checks for fifty dollars each and three brought smaller amounts to be used in equipping the operative suite, saying that they wished to show in a tangible way their appreciation for what the institution had done for them.

The annual outing to Bronx Park, which the Elks have given to us for so many years, was postponed this year on account of cases of poliomyelitis in White Plains. When the children finally decided there was no longer any hope of going as the fall school session had been long under way, the Elks invited them, and once again they had a glorious day in the Park. On their return they all

agreed they enjoyed the Park more in the fall and hoped that in the future that might be the chosen time of the year.

The school work is very satisfactorily carried out by an excellent staff of six teachers, who are admirably fitted for their special work and personally interested in their pupils. All children of school age have had instruction either in the school rooms or at the bedside, as we now have one teacher who gives full time to bedside work and another who combines bedside teaching with the kindergarten. The Christmas play given this year under the direction of Miss Sara Mack, the kindergarten teacher, was a charming introduction to a most delightful half-hour of listening to Mischa Elman.

I wish to take this opportunity to thank Mr. Frank Goodale and Mr. Harry Nightingale for the many hours of joy they have given the patients by bringing the Movies to those who cannot go to them.

Reference to the Gift List shows that our former friends have continued in their constant interest and aid, and that we have made new friends during the year.

In closing, I wish to express my appreciation of the faithful service of all those who have aided in the work of the institution, for to their loyal cooperation is due the success of the year's work.

Statira M. Bridgman,
Superintendent.

The sum of $7,500 endows a bed in perpetuity, and the sum of $350 entitles the donor to a bed for one year.

FORM OF CERTIFICATE TO THE DONOR OF AN ENDOWED BED IN PERPETUITY

New York Orthopaedic Dispensary and Hospital

This is to Certify that the New York Orthopaedic Dispensary and Hospital through its Trustees has received from

.....

herein designated as the donor, a fund of Seven Thousand Five Hundred Dollars, for the purpose of founding and maintaining in accordance with its corporate powers an endowed bed in its Hospital in perpetual memory of

.....

The donor shall have the privilege of nominating the occupant of said bed, but such nomination and the use of said bed shall be subject to all such rules and regulations governing endowed beds, and providing for the treatment, reception and discharge of patients as now exists or which may hereafter be enacted by the Board of Trustees of said Dispensary and Hospital.

Witness this corporate seal of the New York Orthopaedic Dispensary and Hospital, and the signatures of two of its officers, this.....day of.....one thousand nine hundred and.....

....

Secretary. President.

FORM OF BEQUEST

I bequeath to the New York Orthopaedic Dispensary and Hospital, a corporation incorporated under the Laws of the State of New York, the sum of.....dollars to be applied to the benevolent uses and purposes of said hospital.

NEW YORK ORTHOPAEDIC DISPENSARY AND HOSPITAL

420 EAST 59TH STREET

Open from 1 to 3 P. M. Daily (Sundays and Legal Holidays Excepted) for the Reception and Treatment of Patients.

OBJECTS OF THE INSTITUTION.—"To furnish treatment to the poor with special reference to the Diseases and Deformities of the Spine and the Hip Joints and other of the more serious diseases of the bones and joints requiring surgical and mechanical treatment, and for giving instruction in the same." All cases of deformity, besides those mentioned, including Club Foot, Lateral Curvature of the Spine, Infantile Paralysis, Bow-Legs, etc., are received and treated.

RULES GOVERNING THE ADMISSION OF PATIENTS TO THE DISPENSARY DEPARTMENT.—Professional services are rendered gratuitously. Those who can afford to do so are expected to reimburse the Institution for the actual cost of apparatus. Payment for apparatus is received in installments, if required. Apparatus, however, is never *sold* to patients or others, the Institution reserving the right to remove the apparatus and discharge any patient not complying with the directions of the Surgeons. Apparatus will not be supplied in any case that does not come under the immediate care of the Institution.

RULES GOVERNING THE ADMISSION OF PATIENTS TO THE HOSPITAL DEPARTMENT.—Any suitable Orthopaedic case may be admitted. Application for admission may be made at the Hospital during the regular Dispensary hours.

RULES GOVERNING THE ADMISSION OF PATIENTS TO THE COUNTRY BRANCH AND INDUSTRIAL SCHOOL.—Applications for admission to this Hospital are made through the City Hospital, and only patients who are under treatment at the City Hospital will be admitted to the Country Branch.

THE MEDICAL PROFESSION and the public generally are invited to visit the Institution.

THE INSTITUTION is supported by the contributions of the benevolent. Contributions, which are earnestly solicited, may be sent to the Treasurer.

REPORT OF THE PRESIDENT

To the Board of Trustees and the Board of Supervisors,

Ladies and Gentlemen:

The members of the two boards, kept in touch with the affairs of the Hospital by attendance at meetings and by the reports of the Surgeon-in-Chief and of the Treasurer, are aware of the satisfactory condition of our institution. The statistics in a condensed form for the year 1926 will be of interest to them however, as well as to our many friends and subscribers whose continued support has made it possible to continue this work for the ailing and crippled who come to us for relief and cure. 8,301 new cases were registered, 80,290 visits were made to the Dispensary. Our nurses made 7,010 visits to patients. 12,118 X-Ray photographs were taken. Our surgeons performed 1,466 operations.

These figures are impressive as giving an idea of the activity of the City hospital and dispensary. The Country Branch at White Plains supplements this work by affording a place where recuperation, convalescence and cure are effected under the best of conditions and where the 165 beds for children and adults are in constant use. Both hospitals have been taxed to capacity the past year.

The report of the Treasurer shows that the books for both institutions were closed with a slight balance carried over for the new year. For the generous gifts of our friends and subscribers which have made this possible, we are grateful.

This condition, too, reflects great credit on the management, and to the two Superintendents and their staff our thanks are due. The budget was carefully prepared and has been conscientiously followed, a careful watch being kept to avoid needless expenditures. The result has been that receipts have met expenses and no debt has been incurred.

The Private Pavilion has justified itself, and the judgment of the two boards in entering upon this undertaking has been proved sound. The number of patients treated in the Private Pavilion during 1926 was 167, and while the census of patients never at one time has exceeded two-thirds of the capacity of the building, the receipts have been substantially more than the cost

of operation and this excess has gone far to increase our total income and produce the surplus in the City hospital account.

A further reason for satisfaction is the increasing use of the Private Pavilion by the younger members of the staff. This is of mutual benefit; for while we are fortunate in being able to offer them the facilities of this most excellent plant, it is to their loyalty and increasing support that we must look for its continued success in the future.

The amounts received by bequest during the year have been, as always has been the custom, placed in the permanent funds of the institution and will help to meet the ever-increasing expenses of our work.

The annual report of the Surgeon-in-Chief gives in detail the amount of work done and the character and number of operations performed. It should be said here, however, that as to the professional side of the work of our hospital, the highest standard is being maintained and that the original, scientific work of Dr. Hibbs and the Staff is being more widely acknowledged both in this country and abroad, and the New York Orthopaedic Hospital recognized as holding the foremost place in this special branch of surgery.

The hospital properties and buildings in New York and at White Plains have been well kept up; adequate appropriations having been made for renewals and repairs, so that each is placed by the State Board of Charities in Class I, both as to plant and administration. In the City hospital an addition is under construction which will supply a large room for lectures, scientific meetings and assemblies, the need of which has been felt in the past and the value of which to our work will soon be proved.

At the Country Branch changes in the laundry and machine shop are under way. The pressure on the laundry there, due to the increased number of patients, will be relieved by relocating it and by the purchase of certain additional equipment.

At the annual meeting in December the resignation of Mr. John Sloane as Secretary of the Board of Trustees, in which position he had served faithfully for the past three years, was accepted with regret, and Mr. De Lancey K. Jay was unanimously elected Secretary in his place.

Respectfully submitted,

ROBERT S. BREWSTER,
President.

January 25, 1927.

REPORT OF THE BOARD OF SUPERVISORS

To the Trustees of the New York Orthopaedic Dispensary and Hospital,

GENTLEMEN:

We have the honor to present to you the Report of the Board of Supervisors.

We may look back on the year 1926 as one of success and unexpected prosperity.

We have as usual been most fortunate in the loyalty and help of our many friends.

Our auxiliary societies have been unfailing in their work.

The Orthopaedic Hospital Red Cross Unit has made many of the dressings used in the Hospital.

The Orthopaedic Hospital Guild, besides supporting three free beds, has again provided linen and clothing for the two Girls' Wards.

The Orthopaedic Hospital Sewing Society has given much of the linen used and the Junior Guild has given all the clothing for the children on the 6th Floor, supported a free bed and paid the salary of a visiting nurse.

Our loyal friend, Miss Caroline White, has again been most liberal in giving toward the support of a masseuse.

That very important branch of the Hospital service, the Visiting Nurses, has been most generously supported by Mrs. Charles B. Alexander, Mrs. Robert S. Brewster, Mrs. Whitelaw Reid, Mrs. Henry White, Mrs. Frederick Vanderbilt, Mrs. A. Murray Young, Mrs. L. Sanford Procter, Mr. Harry F. Knight, and the Junior Guild. One cannot over-emphasize the value of this branch of the Hospital work or be grateful enough to those who made it possible.

The Private Patient Pavilion has justified its existence both by the number of patients treated there and as a financial success.

It has more than paid its way, although at no time have more than three of the four floors been opened.

Christmas Eve and Christmas Day were as gay and happy as any preceding ones. Thanks to the kindness of the Ladies of the Board, the Orthopaedic Hospital Guild and the Junior Guild, there were Christmas trees for every ward floor and a huge Dispensary tree, a present for each of the several hundred Dispensary children. Each patient received a present and every nurse a present and a book. There was also a Nurses' Party. The Hospital was gay with holly and decorations, ice cream and cake was served with the Christmas dinner and baskets were distributed to the families of the patients. Many kind friends helped to maintain the Christmas spirit.

The amounts received by bequest during the year have been, as always has been the custom, placed in the permanent funds of the institution and will help to meet the ever increasing expenses of our work.

Respectfully submitted,

CORA OLIVER CHOATE,
Secretary.

THE BABIES' WARD IN THE CITY HOSPITAL WITH MOTHER GOOSE DECORATIONS

REPORT OF THE SURGEON-IN-CHIEF

To The Board of Trustees of the New York Orthopaedic Dispensary and Hospital.

GENTLEMEN:

The total number of patients treated in the institution during the year 1926 was 24,043. Of this number 8,301 were new cases and the remainder were those continued under treatment at the beginning of the year.

Of this number 1,466 were suffering from joint tuberculosis; 6,725 from deformities of the feet; 9,352 for non-tuberculosis deformities of the spine, of which 260 were developmental. There were 932 fractures, 104 of which were of the spine, and 3,363 were cases of paralytic deformities. The remainder, 10,625, were suffering from a great variety of disease and deformity.

Table I shows the results in the treatment of these patients, and it appears that 664 were discharged cured; 3,959 were discharged relieved; 613 were discharged for neglect; 49 were discharged incurable; 4,625 were discharged after their first visit or came for consultation only; 410 were referred to other clinics; 52 died, and 13,671 were carried forward under treatment at the end of the year.

Table II shows that the total number of revisits made in the Dispensary in the year was 71,979; the visits by new patients 8,301; the number of visits by visiting nurses to patients at their homes was 7,010, making a grand total of 87,290 visits. The number of patients visited by nurses at their homes was 2,482.

In Table III there appears the detail of the work in the manufacture of braces in the shop. The total number of instruments made was 2,844, and the number repaired was 4,191.

CITY HOSPITAL. The number of patients in the hospital on January 1, 1926, was 81; the number admitted during the year was 889; the number discharged during the year was 884; the number who died during the year was four, leaving 82 in the hospital on January 1, 1927. The average number of patients in the ward each day was 88; the average stay of each patient was 33.1 days. There were 187 waiting for beds at the end of the year.

The number of operations performed was 1,466, and the number of patients operated on was 1,120 (Table V).

Private Patients' Pavilion. The number of patients treated in the Pavilion during the year was 167; the number of patient days was 5,204; ten were in the hospital on January 1, 1926. The number admitted was 157; the number discharged was 159, leaving eight in the Pavilion on January 1, 1927. This aspect of the institution's activities, I think, has justified its usefulness in furnishing opportunity for 167 people to receive treatment in the institution. Financially it has not been a burden to the institution. On the contrary, though possibly indirectly, it is a great asset, not only in increasing the number of people who are interested in our institution, but may be helpful to us in stimulating our staff.

Country Branch. The number of patients in the Hospital at the beginning of the year was 147; the number admitted was 249; the number discharged was 236, one died, leaving 159 in the Hospital on January 1, 1927.

This Hospital has been run during the year to capacity and has made it possible to do a much larger volume of work in the City Hospital and is serving a very important purpose. A very large percentage of the patients are those of all ages suffering from joint tuberculosis. It is gratifying to find gradually disappearing the isolation of this Hospital from the City branch. It is of course an intimate integral part of that service, and must be so if good work is done.

There are so many aspects of the work of the two institutions that are interesting that it is difficult to choose from them those which will give you in a brief way a comprehensive conception of its activities during the year. There certainly is no more important feature of this work than that pertaining to the study and treatment of joint tuberculosis. Gradually our whole conception of this disease and its treatment have undergone a change. Twenty-five years ago our treatment was by conservative methods which lasted for an indefinite number of years, requiring long periods of stay in the hospital, with ultimate failure to cure the joint. These cases are all now operative and in the main are cured in from one to two years and freed from the necessity of any further treatment. This change in the methods of treatment applies to many other diseases which come to our hospital for treatment, such as the deformities of infantile paralysis, scoliosis, fractures of the spine, etc., etc. Many of these cases in former years were compelled to wear braces for years which were ineffective, expensive to the patient, and altogether unsatifactory. With the modern development of operative work, these conditions are completely relieved in a comparatively short time. The pa-

tients are freed from the necessity of wearing any apparatus and from any further form of treatment. Such a change in surgical methods has a very important bearing upon the economic aspect of such an institution as ours, as is illustrated by the shorter duration of stay in the hospital, for instance: In the past years the duration of stay was from one to five years and now it is from 33 days to one year. Another illustration of this influence of surgical methods is in the shop for the manufacture of braces. In 1899, for a service of 3,244 patients, 1,124 braces were made, while in 1926, for the service of 24,043 patients, 2,844 braces were made. Thus it may be seen that with the same money a much larger number of people received the benefit of the institution's service. For instance, 36 people were treated by operation in 1899, with an average stay of 126 days in the hospital, while in 1926, 1,120 patients were treated by operation, with an average stay in the hospital of 33 days.

The activities of the staff in teaching the third and fourth year students of Columbia University have continued as in former years and this is an important feature of the institution's service.

Respectfully submitted,

Russell A. Hibbs,

Surgeon-in-Chief.

ENTRANCE HALL IN THE PRIVATE PATIENTS' PAVILION

REPORT OF THE SUPERINTENDENT

To the Board of Trustees,
New York Orthopaedic Dispensary and Hospital.

GENTLEMEN:

The annual report of the superintendent for the year 1926 is herewith presented.

The total expenses for the year were $355,021.42, and I refer you to the Treasurer's report for a detailed accounting of these expenses.

The cost of running hospitals has not increased to a surprising degree when we consider how much more is done for each individual patient today than was the case in former years, and also the expensive mode of living which is now expected by nearly everyone, making the demands on a hospital by its patients greater year by year.

The number of patients treated in the wards last year was 970. There were 32,217 patient days and of these 22,686 were free and 9,531 were pay days. The cost per patient day in the ward was $5.09. The ward beds have been kept full during the entire year, and the Country Branch at White Plains has relieved the pressure as in the past by caring for the patients for long periods of time.

The Dispensary was very active; 80,290 visits were made during the year. The cost per visit was $1.02, and with the exception of the first visit made by each patient to the Dispensary, the entire number made was free.

The visiting nurses who visited the homes of patients at a cost of $1.44 per visit, assist in the Dispensary with the Doctors and see the same patients whom they visit in the home.

The pathological laboratory, the brace shop, and the X-Ray, dental and corrective gymnastics and massage departments were all most active during the entire year. The department of dentistry has been reorganized and we are very fortunate in having

Dr. William B. Dunning in charge, who is deeply interested in developing this work.

The nursing department in the hospital was reorganized this year so as to include a three months course in orthopedic nursing for graduate nurses. This course was started October first and we are hoping that it will not only help to meet the great need which exists for graduate nurses who are trained in the care of orthopedic patients, but will enable us to give to the ward patients in our hospital better nursing care.

The housekeeping and dietetic departments, which formerly were united under one head, were divided in September and this change is proving most satisfactory.

The private pavilion has cared for 167 patients; there were 5,204 patients days at a cost of $13.76 per day. Already this pavilion has proven what a needed adjunct it is to the hospital.

During the past year there have been a great many changes in the work and in some cases of the workers. The one great change came about in the brace shop by the death of John Schum, the head of the shop, who had worked at the hospital for over fifty-two years. This means a great loss as John was loved by everyone and was most efficient and effective in his work.

To all those who have contributed by gift or personal service in any way to the hospital, our thanks are due. Interest, no matter in what way it is expressed, means a great deal, not only to the hospital itself, but to the workers as well who are endeavoring to carry on the work.

Respectfully submitted,

THEODORA S. ROOT,
Superintendent.

ORTHOPAEDIC HOSPITAL GUILD REPORT

There is very little new in the report of the past year. It is much the same as the year 1925. We have paid for three endowed beds, the third since the end of the year, have kept our linen closet well filled, and have furnished the necessary clothing, bedding, etc., for 20 beds. It is with deep regret that we are obliged to report the deaths of four of our members: Mrs. Perry, Mrs. Louis Livingston Seaman, Mrs. Arthur B. Twombly and Mrs. Frederick Vanderbilt.

Mrs. Overton's Red Cross Unit has accomplished great work the past year. Mrs. Huntington Norton, as in former years, has very kindly filled the Christmas stockings for our Wards, which we appreciate very much indeed.

Respectfully submitted,

FLORENCE B. FLEMING,
Secretary.

REPORT OF THE ORTHOPAEDIC HOSPITAL SEWING SOCIETY

The annual report of the Orthopaedic Hospital Sewing Society for the year 1926 varies little from the previous year. Although fewer articles were added to the linen closet during the year, January 1st finds us with 101 articles less than we began the year with.

No. of Articles on hand January 1, 1926	3,605
No. of Articles added during the year	4,537
	8,142
No. of Articles used	4,638
Leaving in linen closet January 1, 1927	3,504

The past year has been a sad one for the Society, because of the number of members lost through death and resignation.

Respectfully submitted,

KATHERINE M. LUCE,
Secretary.

REPORT OF THE SUPERINTENDENT OF THE COUNTRY BRANCH

To the Board of Trustees of the New York Orthopaedic Dispensary and Hospital.

GENTLEMEN:

The report of the Country Branch for the year 1926 is herewith submitted.

At the beginning of the year there were 147 patients in the Country Branch; 10 adults, and 137 children between the ages of 2 and 16 years. During the year, 249 patients were admitted, 236 discharged, and one died, making a total of 159 in the hospital at the close of the year; of which 27 were adults, 133 between 2 and 16 years of age, and one under 2 years. The figures show an increase in the number of adult patients, 60 having been admitted in 1925 and 86 in 1926; 10 having been in the hospital at the beginning of last year and 27 at its close. Comparison of the average length of stay of patients in the past two years shows a decrease from 177 to 146 days. During the year, 27 of our former patients returned for a second period of treatment, the time since their discharge varying from 1 month to 12 years. The daily average was 158 patients compared with 160 last year. The per capita cost increased 14% per patient day over last year, due mainly to increase in salaries and wages.

Expenses for repairs and improvements have been greater than in previous years, as new tiled walls, floors, and modern equipment have replaced the old in the culinary department. Other improvements include the installation of new electric outdoor lights fed by underground wires and also specially made cast-iron leaders. Plans for further improvement now being worked out include moving the laundry into larger quarters and increasing its equipment; and the remodelling of the present laundry space into dining and serving rooms for the employees.

The hospital staff has been very much strengthened this year by the appointment of Dr. W. H. Watters as Attending Surgeon, of Dr. Muller as regular Dentist and Miss Ungemach as Dental Hygienist.

A regular Occupational Therapist was added to our force during the year for the patients in the Tower Building, and through the generosity of Mrs. Henry M. Tilford we were able to have an additional therapist for six months who taught special subjects to both Tower Building and East and West Wing patients.

A new steel viewing cabinet illuminated by Cooper-Hewitt tubes was purchased for the X-Ray department. Eighteen per cent more patients were X-Rayed, and 49 per cent more X-Ray films were used than during the preceding year.

Miss Ruth Ordway has completed her work in our schoolrooms. The schoolroom for the older children has been decorated with scenes from the Legend of King Arthur; one for the younger children with fairy tales. The playroom for younger children is bright with colored illustrations of Mother Goose rhymes, while in the kindergarten scenes from child life are portrayed in color.

We wish to take this opportunity to thank the many friends who have remembered us during the year by gifts and by entertainments for the patients. Especially are we indebted to the Gedney Farm Association for our beautiful outdoor Christmas tree, for a bountiful Christmas Eve supper, and for entertainment and gifts for the children.

To all whose faithful service and loyal cooperation, both directly in the care of the patients and indirectly in the maintenance of the institution, have made possible another successful year's work by the hospital, we wish to express our sincere appreciation and thanks.

Respectfully submitted,

STATIRA M. BRIDGMAN,

Superintendent.

The sum of $7,500 endows a bed in perpetuity, and the sum of $350 entitles the donor to a bed for one year.

FORM OF CERTIFICATE TO THE DONOR OF AN ENDOWED BED IN PERPETUITY

New York Orthopaedic Dispensary and Hospital

This is to Certify that the New York Orthopaedic Dispensary and Hospital through its Trustees has received from

.....

herein designated as the donor, a fund of Seven Thousand Five Hundred Dollars, for the purpose of founding and maintaining in accordance with its corporate powers an endowed bed in its Hospital in perpetual memory of

.....

The donor shall have the privilege of nominating the occupant of said bed, but such nomination and the use of said bed shall be subject to all such rules and regulations governing endowed beds, and providing for the treatment, reception and discharge of patients as now exists or which may hereafter be enacted by the Board of Trustees of said Dispensary and Hospital.

Witness this corporate seal of the New York Orthopaedic Dispensary and Hospital, and the signatures of two of its officers, this.....day of.....one thousand nine hundred and.....

....

Secretary. President.

FORM OF BEQUEST

I bequeath to the New York Orthopaedic Dispensary and Hospital, a corporation incorporated under the Laws of the State of New York, the sum of ..... *dollars to be applied to the benevolent uses and purposes of said hospital.*

NEW YORK ORTHOPAEDIC DISPENSARY AND HOSPITAL

420 EAST 59TH STREET

Open from 1 to 3 P. M. Daily (Sundays and Legal Holidays Excepted) for the Reception and Treatment of Patients.

OBJECTS OF THE INSTITUTION.—"To furnish treatment to the poor with special reference to the Diseases and Deformities of the Spine and the Hip Joints and other of the more serious diseases of the bones and joints requiring surgical and mechanical treatment, and for giving instruction in the same." All cases of deformity, besides those mentioned, including Club Foot, Lateral Curvature of the Spine, Infantile Paralysis, Bow-Legs, etc., are received and treated.

RULES GOVERNING THE ADMISSION OF PATIENTS TO THE DISPENSARY DEPARTMENT.—Professional services are rendered gratuitously. Those who can afford to do so are expected to reimburse the Institution for the actual cost of apparatus. Payment for apparatus is received in installments, if required. Apparatus, however, is never *sold* to patients or others, the Institution reserving the right to remove the apparatus and discharge any patient not complying with the directions of the Surgeons. Apparatus will not be supplied in any case that does not come under the immediate care of the Institution.

RULES GOVERNING THE ADMISSION OF PATIENTS TO THE HOSPITAL DEPARTMENT.—Any suitable Orthopaedic case may be admitted. Application for admission may be made at the Hospital during the regular Dispensary hours.

RULES GOVERNING THE ADMISSION OF PATIENTS TO THE COUNTRY BRANCH.—Applications for admission to this Hospital are made through the City Hospital, and only patients who are under treatment at the City Hospital will be admitted to the Country Branch.

THE MEDICAL PROFESSION and the public generally are invited to visit the Institution.

THE INSTITUTION is supported by the contributions of the benevolent. Contributions, which are earnestly solicited, may be sent to the Treasurer.

INTERN SERVICE

The house staff consists of six interns, each serving for two years. Appointments are made in April, August and December, and only those who have served a general hospital internship are eligible.

Application blanks will be sent upon request.

ANNIE C. KANE FELLOWSHIPS

Eight fellowships to be known as the Annie C. Kane Fellowships have been established at this hospital. These fellowships offer to selected young surgeons who have first completed their internship in this hospital an opportunity to continue their training in orthopedic surgery for from three to five years, and will carry a substantial annual salary.

DISPENSARY

REPORT OF THE PRESIDENT

To the Board of Trustees and the Board of Supervisors,

Ladies and Gentlemen:

The most important item of interest to be noted for 1927 is the purchase of property adjoining the city hospital. This will provide for possible expansion, and as it is a measure for safeguarding the future it seems appropriate that it should be made by the James Fund. Fortunately, although the prices paid were high, the properties are well rented and carry themselves on a reasonable income producing basis.

The annual report of the Surgeon-in-Chief deals with the professional and technical side of our work, for which reason this report will not refer to it other than to remark that the high standard of treatment has been maintained, and the work of our surgical staff is each year being more widely studied and commended.

In the X-ray Department has been added a new appliance for photography and for therapeutic treatment; an important and useful addition to this department.

The new room on the seventh floor finished last winter has been put to frequent use, and as a place for assemblies, meetings and lectures has proved of real value.

Through the kindness of Miss Hamilton, Mrs. Pyne and Mrs. White of the Board of Supervisors, the three children's wards on the sixth floor have been decorated. The painting has been done by Miss Ordway in a very graceful and charming manner and has given great delight to the small patients in those wards.

A generous gift from Dr. Hibbs has been used for altering and furnishing two rooms on the second floor to be used as a library. This important addition to our hospital will be of increasing value and, in order that the books may be properly cared for and made accessible for study and reference, a librarian has been appointed. In addition to her work in the library, she will be available for research and other details in connection with our study of end results.

The number of patients treated in the Private Pavilion has been about the same as last year. It has not yet been necessary to put into use more than three floors, but the revenue from the

Private Pavilion has been substantial and has carried the cost of operating.

In the engine room and heating plant, the engineers and firemen have been put on the basis of the eight hour day and the six day week. The greater cost in wages of this change has been offset by better feeling and smoother operation in this department.

The post graduate course for nurses has completed its first year with reasonably satisfactory results. We are warranted in continuing this course at least another year.

The Board of Trustees has approved the employment of graduate nurses throughout (in the City Hospital) and this plan is being put into effect. It is advisable because the patients are in need of active care, mostly post operative, until transferred to the Country Branch.

A financial measure in the nature of a change in policy was adopted in October at which time a scale of charges for dispensary treatments was put into effect. This was a reasonable and wise measure, in line with the common practice in other New York dispensaries. While this has had a tendency to reduce somewhat the use of the gymnasium and massage departments, the charges have been recognized by our patients as just.

The Treasurer's report indicates that the year will close with all expenses in the City Hospital covered, but that a deficit will probably result in the operation of the Country Branch. The expenses there have been carefully watched and have been kept within the budget, but the greater amount of care and treatment required by our patients now as contrasted with former years, have obliged us to adopt each year a steadily rising budget.

Among other items of expense this year was the salary of the teacher of occupational therapy, heretofore met by an individual gift, but this year renewed only to a small extent.

The new laundry has been completed and has been put into service. The conditions under which the operatives work are greatly improved and this satisfactory result has fully warranted the expense of making the change from the old laundry. This latter will be used for the help's dining room, the necessary repairs and painting being done by our own men.

A radio equipment with loud speakers in all wards has been installed, the expense of which has been met by private subscription.

The Country Branch with its one hundred and fifty patients and requisite staff is a large hospital in itself, the matter of upkeep and renewal being a material item. This has not been neg-

lected but it is a substantial expense and must be adequately provided for in the budget, now and in the future.

This report, although it attempts only to summarize the activities and condition of our institution, shows that we have intrusted to our care a very large undertaking. The combined budget of $475,000 annual expenditures is clear evidence of this.

The earnest and thoughtful consideration of its problems, its needs and its defects, is called for, and must be given by all of us who have its welfare so much at heart, and while I cannot expect each individual member of the two boards to keep in full and constant touch with the many activities of the Orthopaedic, I do urge you most earnestly to spare the time to visit frequently if possible, occasionally if not, the hospital where your presence and your interest will prove a stimulus to the officers, the staff and the personnel.

For the faithful performance of their duties and for the loyal service rendered by our employees I express my warm and grateful appreciation.

Respectfully submitted,

Robert S. Brewster,
President.

REPORT OF THE BOARD OF SUPERVISORS

To the Trustees of the New York Orthopaedic Dispensary and Hospital,

GENTLEMEN:

Another year has passed and we have again to thank our many friends for their help and loyalty.

Our auxiliary societies have worked with their usual devotion. The Orthopaedic Hospital Red Cross Unit has made many dressings. The Orthopaedic Hospital Guild has supplied linen and clothing for the two Girls' Wards besides supporting four free beds. The Junior Guild has paid the salary of a visiting nurse, supported a free bed, and given all the clothing for the children on the sixth floor. The Orthopaedic Hospital Sewing Society has given the linen in the Hospital. Miss Caroline White, with her unfailing generosity, has given toward the support of a masseuse.

Our visiting nurses, without whose work the Hospital could never be the efficient organization it is, have been generously supported by Mrs. Charles B. Alexander, Mrs. Robert S. Brewster, Mrs. Whitelaw Reid, Mrs. Henry White, Mrs. A. Murray Young, Mrs. L. Sanford Procter, Mr. Harry F. Knight, and the Junior Guild.

The decoration of the walls of the children's wards through the kindness of Miss Hamilton, Mrs. Percy Pyne, and Mrs. Henry White has brought great pleasure to the little patients, and is a most charming and lasting gift.

Christmas Eve and Christmas Day, both in the Dispensary and the Hospital, were very merry and everyone was remembered. The Christmas tree and greens made the wards and Dispensary gay and bright. This was all made possible by our kind friends, the ladies of the Board, the Orthopaedic Hospital Guild, and the Junior Guild.

The year 1926 was such an interesting and successful year that it hardly seemed possible that 1927 could be anything but an anticlimax, but the constant enlarging of the Hospital's work and interests, the loyalty and generosity of our many friends, and the faithful work of those connected with the Hospital have made this year an outstanding one.

Respectfully submitted,

CORA OLIVER CHOATE,
Secretary.

THE LITTLE BOYS' WARD—CITY HOSPITAL

REPORT OF THE SURGEON-IN-CHIEF

To The Board of Trustees of the New York Orthopaedic Dispensary and Hospital.

GENTLEMEN:

The total number of patients treated in the institution during the year 1927 was 24,332. Of this number 9,669 were new cases, and the remainder were those continued under treatment at the beginning of the year.

Of this number 1,479 were suffering from joint tuberculosis; 6,930 from deformities of the feet; 1,225 from non-tuberculosis deformities of the spine, of which 234 were developmental. There were 915 fractures, 132 of which were of the spine, and 3,328 were cases of paralytic deformities. The remainder, 10,455, were suffering from a great variety of diseases and deformities.

Table I shows the results in the treatment of these patients, and it appears that 577 were discharged cured; 3,141 were discharged relieved; 254 discharged for neglect; 48 were discharged incurable; 3,751 were discharged after their first visit or came for consultation only; 248 were referred to other clinics; 36 died, and 16,277 were carried forward under treatment at the end of the year.

Table II shows that the total number of revisits made in the Dispensary was 75,450; the visits by new patients was 9,669; the number of visits by visiting nurses to patients at their homes was 6,950, making a grand total of 92,069. The number of patients visited by nurses at their homes was 4,676.

In Table III there appears the detail of the work in the manufacture of braces in the shop. The total number of instruments made was 3,444, and the number repaired was 3,884.

City Hospital. The number of patients in the Hospital on January 1, 1927, was 82. The number admitted during the year was 893; the number discharged during the year was 882; the number who died during the year was 3, leaving 90 in the hospital on January 1, 1928. The average number of patients in the ward each day was 86; the average stay of each patient was 31 days. There were 234 waiting for beds at the end of the year.

The operative work in the City Hospital has been as active as its capacity permits, the total number of operations being 1,503 and the number of patients operated on was 1,137. (Table V).

The Private Pavilion has carried itself during the year without being a financial burden to the hospital, and is rendering a distinctly useful service to those who are able to pay for it.

Country Branch. The number of patients in the Hospital at the beginning of the year was 159; the number admitted was 224; the number discharged was 219; 2 died, leaving 162 in the Hospital on January 1, 1928.

Both hospitals and the dispensary have been running during the entire year at capacity, as is shown by the details in tables accompanying this report. The duration of stay of patients in the City Hospital was 31 days. This is made possible only by the fact of our having the Country Branch, where, after operation, patients are sent for their convalescence, thus making beds available in the City Hospital to a larger number of patients each year. Despite this fact, there are rarely less than 200 people waiting for beds.

The total number of patients treated in the Country Branch for the year was 383, and the duration of stay an average of 153 days. This hospital, too, has been running to capacity, and it is unnecessary to emphasize the valuable service it renders.

Constant improvement in surgical work has an important bearing upon the cost per patient for such service. This is illustrated by the fact that under the older methods of surgical treatment many patients required long periods of hospital treatment, often from three to six years, with cures still incomplete, while now the same cases, under improved surgical methods, require only one year in the hospital when their cures are complete.

While it is a fact that the annual budget of running expenses of both hospitals shows each year an increase, it must not be lost sight of that the amount of money spent on the individual patient is much less and the service of the institution is therefore available to a much larger number. It is also interesting to observe the fact that the patients themselves are making a very substantial contribution in board and materials, though nothing whatever for their surgical and medical care. Another point is important. The amount of free work done in both hospitals is larger than that of any other hospital of a similar nature in the city, and it stands fourth in the amount of its free work in comparison with any of the large general hospitals. The total number of free days' care in the City Hospital and Country Branch was 66,898, while the number of pay days was 23,358.

I have called your attention in the past to the importance of the department for the study of end results. We have not always had available a surgeon to give his time to this work, but, beginning January 1, 1927, Dr. Joseph C. Risser, a graduate from our house staff, was appointed to this service, and during the year has made a careful end-result study of 732 patients who had received surgical treatment in the hospital during previous years. These patients were brought back to the hospital and a very careful estimate made of the value of the surgical procedure to their welfare. This is obviously one of the most important aspects of our work, and still too incompletely done, as in dealing with the type of surgery which is done here, the estimate of its value cannot be made except by seeing patients long afterwards.

One illustration of the value of this service may be noted, —that in connection with the treatment of scoliosis or lateral curvature of the spine, which until 1914 was considered a progressive and an incurable deformity. At this date we began to operate upon these cases, and from 1914 to 1926, inclusive, 348 cases were operated. This, as perhaps you know, is an extensive and more or less serious operation, but in this number there was a mortality of only 1 per cent., four cases. The end-result study of the cases that have been done over a long period of time has enabled us to check up upon our work and will insure for the future much better work.

Another large group in this class was 154 cases of tuberculosis of the knee-joint, 519 cases of tuberculosis of the spine (humpback), and many others. It must be remembered that a large part of the surgery done in our hospitals is upon children, and because of this fact it is especially important that an end-result study should be made long after their operations as they approach adult life.

Respectfully submitted,

Russell A. Hibbs,
Surgeon-in-Chief.

REPORT OF THE SUPERINTENDENT

To the Board of Trustees,
New York Orthopaedic Dispensary and Hospital.

GENTLEMEN:

I have the honor to present herewith the Superintendent's report of the dispensary and hospital for the year 1927.

The activities for the year have been much the same as in previous years. It is a source of satisfaction to realize that the highest standards for treatment and the greatest good of the patient, the objects for which this institution exists, have been maintained.

The total number of patients treated in this institution during the year was 24,332. 85,119 visits were made to the dispensary at a cost of $1.01 a visit. The Visiting Nurses made 6,950 visits to the homes at a cost of $1.52 a visit. In the wards 975 patients were treated, there being 31,346 patient days. The cost per patient day was $5.51, and the average stay in the ward was 31 days. In the X-ray department 13,895 X-rays were taken. In the Massage and Gymnasium departments 39,583 treatments were given. The Pathological Laboratory made 7,064 tests.

The usual amount of painting has been done on the buildings and the standard of general upkeep has been maintained during the year. The walls of the three children's wards on the sixth floor have been decorated with most attractive mural decoration. A new room has been constructed at the top of the building on the 58th Street side. This room will be used for meetings and for assemblies of different kinds. In the X-ray department a new treatment machine has been installed.

The most noteworthy addition during the year is that of rebuilding a portion of the second floor to allow the housing of a medical library which has been established in this hospital. In connection with the medical library, a library for the patients on the wards will be maintained. A full-time librarian has been

engaged, who will take care of the medical library and will also visit the patients on the wards, distributing books to them.

The post graduate course in orthopedic nursing for graduate nurses, which was established at this hospital a year ago last October, has proved most satisfactory, in that it helps meet the increasing demand for trained orthopedic nurses which is felt throughout the country. A great number of nurses have been graduated.

The ward nursing in this hospital has been carried on by undergraduates under the direction of graduate nurses until October of this year, when the use of undergraduates was discontinued and graduates were engaged. Such a change meant an increase in expenses, but as the type of nursing required for orthopedic patients has changed so in the last few years we must meet this need with trained nurses in order to give efficient service to our patients.

The Private Pavilion has been active during the entire year.

There have been but few changes in the staff and workers and but little sickness.

We are deeply indebted to the guilds, organizations and individuals who have assisted us and rendered aid to the hospital, and to the friends of the hospital for their most generous contributions of money and gifts.

For the loyal support and co-operation which have been given by the staff and personnel I am most grateful.

Respectfully submitted,

THEODORA S. ROOT,
Superintendent.

ORTHOPAEDIC HOSPITAL GUILD REPORT

We have been very encouraged with our work of the past year. We have kept our linen closets well filled as usual, and have furnished the necessary clothing, bedding, etc., for twenty beds. We have paid for four endowed beds, a thing which we have never done before. We were enabled to do so by the receipt of a large sum of money through Mrs. Alexander from Mrs. Charles H. Senff. Since giving us such a wonderful gift, we deeply regret to say that Mrs. Senff has passed away. Mrs. Huntington Norton, as in former years, has very kindly filled the Christmas stockings for our wards, which we appreciate very much indeed. Mrs. Overton's Red Cross Unit has accomplished great work the past year.

Respectfully submitted,

Florence B. Fleming,

Secretary.

REPORT OF THE ORTHOPAEDIC HOSPITAL SEWING SOCIETY

The annual report of the Orthopaedic Hospital Sewing Society for the year 1927, like the report of previous years, is largely in figures and therefore more or less monotonous.

The number of articles added during the year was greater than formerly, and as fewer articles were used, we have an unusually good supply to begin the year 1928 with.

No. of Articles on hand January 1, 1927.....	3,504
No. of Articles added during the year.....	5,574
	9,078
No. of Articles used.....	3,453
No. of Articles on hand January 1, 1928.....	5,625

It is with regret the Secretary reports the loss through death and resignation of many members, both Associate and Active, during the past year.

Respectfully submitted,

KATHERINE M. LUCE,

Secretary.

REPORT OF THE JUNIOR GUILD

The work of the Junior Guild has gone on satisfactorily during the past year. A Rummage Sale in the Fall and a movie given at the Heckscher Theatre in the Spring, together with our dollar appeals, have brought in the necessary money. Miss Chalmers continues as our visiting nurse.

Respectfully submitted,

KATE S. R. RAND,
Secretary.

HALLOWE'EN PARTY—COUNTRY BRANCH

REPORT OF THE SUPERINTENDENT OF THE COUNTRY BRANCH

To the Board of Trustees of the New York Orthopaedic Dispensary and Hospital—Country Branch.

GENTLEMEN:

The report of the Superintendent of the Country Branch for the year ending December 31, 1927, is herewith submitted.

There were 159 patients in the Country Branch at the beginning of the year; 23 adults, 135 children between the ages of two and sixteen years, and one under two years. During the year 224 patients were admitted; 83 adults, 133 between the ages of two and sixteen years, and 8 under two years of age. 217 patients have been discharged, two died, leaving 162 in the hospital at the end of the year. The average census was 161 per diem, making the percentage of occupancy 97 per cent. The per capita cost was $3.31 per diem.

Many improvements and repairs have been made during the year. Among the major ones may be noted the following: The laundry relocated, enlarged and scientifically routed; all tables and chairs in Main Building dining rooms reconditioned for several more years service; galvanized iron and brass guards incorporated throughout all buildings in the walls for protection wherever cots and wheel chairs are in constant use. A great deal of painting has been done throughout the institution during the past year, which included the repainting of the outside of the North Wing, the Men's Lounge and lavatories in the same building; the repainting of outside trim, roof and awning supports of Tower Building; practically the entire inside of the Tower Building, which was taken over unpainted from the contractor; the lower ward and dressing room of East Wing; various rooms in the other buildings and all outside iron work, including the fence surrounding the grounds.

The school has continued under practically the same able and devoted teachers who instruct all the children from kindergarten age through the grammar school either in the school rooms or at the bedside. During the year three pupils graduated from grammar school with appropriate exercises. We hope that, during the coming year, the school advantages will be extended to include some high school instruction for those qualified to receive it.

The Occupational Therapy department does much to relieve the tediousness of the long stay in the hospital, the patients finding both profit and recreation in creating articles that are at once beautiful and useful. While the work is in no way vocational, an attempt is made to so teach fundamentals that the patients learn the combined use of mind and hands and are able, after discharge, to progress in the craft in which they become interested while here. Some of the activities taught by the department are: knitting, rake knitting, wood carving, painting, elementary bookbinding, hooked rugs, leather work, needle work and crocheting.

Captain Frank Goodale and Mr. Silas Clark have periodically delighted the patients by current attractions in the "movies." Mr. McDowell and associates have continued their helpful services. The Gedney Farm Association again made Christmas an occasion long to be remembered, and have guaranteed the complete installation of a centrally located radio that will extend to all parts of the institution, Mr. Donald S. Burch kindly offering to supervise the installation. Many other friends have shown their interest in the Hospital by generous contributions of entertainments, gifts and personal service. Such interest as this is an important factor in helping our patients and merits our sincere thanks.

This report would not be complete without a word of appreciation for all members of the staff and the workers in each department whose willing co-operation and splendid spirit of helpfulness has made possible such success as we may have attained.

Respectfully submitted,

STATIRA M. BRIDGMAN,
Superintendent.

FORM OF CERTIFICATE TO THE DONOR OF AN ENDOWED BED IN PERPETUITY

New York Orthopaedic Dispensary and Hospital

This is to Certify that the New York Orthopaedic Dispensary and Hospital through its Trustees has received from

.....

herein designated as the donor, a fund of Seven Thousand Five Hundred Dollars, for the purpose of founding and maintaining in accordance with its corporate powers an endowed bed in its Hospital in perpetual memory of

.....

The donor shall have the privilege of nominating the occupant of said bed, but such nomination and the use of said bed shall be subject to all such rules and regulations governing endowed beds, and providing for the treatment, reception and discharge of patients as now exists or which may hereafter be enacted by the Board of Trustees of said Dispensary and Hospital.

Witness this corporate seal of the New York Orthopaedic Dispensary and Hospital, and the signatures of two of its officers, this.....day of.....one thousand nine hundred and.....

....

Secretary. President.

FORM OF BEQUEST

I bequeath to the New York Orthopaedic Dispensary and Hospital, a corporation incorporated under the Laws of the State of New York, the sum of..... dollars to be applied to the benevolent uses and purposes of said hospital.

NEW YORK ORTHOPAEDIC DISPENSARY AND HOSPITAL

420 EAST 59TH STREET

Open from 1 to 3 P. M. Daily (Sundays and Legal Holidays Excepted) for the Reception and Treatment of Patients.

OBJECTS OF THE INSTITUTION.—"To furnish treatment to the poor with special reference to the Diseases and Deformities of the Spine and the Hip Joints and other of the more serious diseases of the bones and joints requiring surgical and mechanical treatment, and for giving instruction in the same." All cases of deformity, besides those mentioned, including Club Foot, Lateral Curvature of the Spine, Infantile Paralysis, Bow-Legs, etc., are received and treated.

RULES GOVERNING THE ADMISSION OF PATIENTS TO THE DISPENSARY DEPARTMENT.—Professional services are rendered gratuitously. Those who can afford to do so are expected to reimburse the Institution for the actual cost of apparatus. Payment for apparatus is received in installments, if required. Apparatus, however, is never *sold* to patients or others, the Institution reserving the right to remove the apparatus and discharge any patient not complying with the directions of the Surgeons. Apparatus will not be supplied in any case that does not come under the immediate care of the Institution.

RULES GOVERNING THE ADMISSION OF PATIENTS TO THE HOSPITAL DEPARTMENT.—Any suitable Orthopaedic case may be admitted. Application for admission may be made at the Hospital during the regular Dispensary hours.

RULES GOVERNING THE ADMISSION OF PATIENTS TO THE COUNTRY BRANCH.—Applications for admission to this Hospital are made through the City Hospital, and only patients who are under treatment at the City Hospital will be admitted to the Country Branch.

THE MEDICAL PROFESSION and the public generally are invited to visit the Institution.

THE INSTITUTION is supported by the contributions of the benevolent. Contributions, which are earnestly solicited, may be sent to the Treasurer.
